About the job

Sophos is a worldwide leader in next-generation cybersecurity, protecting more than 500,000 organizations and millions of consumers in more than 150 countries from today's most advanced cyberthreats. Powered by threat intelligence, AI and machine learning from SophosLabs and SophosAI, Sophos delivers a broad portfolio of advanced products and services to secure users, networks and endpoints against ransomware, malware, exploits, phishing and the wide range of other cyberattacks. Sophos provides a single integrated cloud-based management console, Sophos Central – the centerpiece of an adaptive cybersecurity ecosystem that features a centralized data lake that leverages a rich set of open APIs available to customers, partners, developers, and other cybersecurity vendors. Sophos sells its products and services through reseller partners and managed service providers (MSPs) worldwide. Sophos has major hubs around the globe. More information is available at www.sophos.com

Role Summary

This role is in the SophosLabs Platform – Data Team and will assist in analyzing data sets, pinpointing trends, and aiding in data-driven decisions. The role will also participate in the development of analytical solutions to facilitate data-informed decisions, along with working with various teams to provide meaningful data for decision-making. The role is also responsible for analyzing security data and presenting findings in a structured manner.

What You Will Do

- Understand business needs.
- Assist in building data systems.
- Use tools to analyze and organize large sets of data.
- Identify data trends and create alerts for anomalies.
- Conduct data analysis and present findings.
- Assist in building algorithms.
- Merge data from various sources.
- Create visualizations for data representation.
- Look for methods to improve data quality.
- Collaborate with data scientists on projects.

What You Will Bring

- Ability to analyze large data sets.
- Familiarity with Python, SQL, and basic programming.
- Strong analytical skills with a background in data analytics.
- Knowledge of Data Quality tools.
- Ability to work independently and with a team.
- Communicate clearly about technical topics.

Remote

#B1

What's Great About Sophos?

- Our people – we innovate and create, all of which are accompanied by a great sense of fun and team spirit
- Employee-led diversity and inclusion networks that build community and provide education and advocacy
- Annual charity and fundraising initiatives and volunteer days for employees to support local communities
- Global employee sustainability initiatives to reduce our environmental footprint
- Global fitness and trivia competitions to keep our bodies and minds sharp
- Global wellbeing days for employees to relax and recharge

- Monthly wellbeing webinars and training to support employee health and wellbeing

Our Commitment To You

We're proud of the diverse and inclusive environment we have at Sophos, and we're committed to ensuring equality of opportunity. We believe that diversity, combined with excellence, builds a better Sophos, so we encourage applicants that can contribute to the diversity of our team. All applicants will be treated in a fair and equal manner and in accordance with the law regardless of gender, sex, gender reassignment, marital status, race, religion or belief, color, age, military veteran status, disability, pregnancy, maternity or sexual orientation. We want to give you every opportunity to show us your best self, so if there are any adjustments we could make to the recruitment and selection process to support you, please let us know.

Data Protection

If you choose to explore an opportunity, and subsequently share your CV or other personal details with Sophos, these details will be held by Sophos for 12 months in accordance with our Privacy Policy and used by our recruitment team to contact you regarding this or other relevant opportunities at Sophos. If you would like Sophos to delete or update your details at any time, please follow the steps set out in the Privacy Policy describing your individual rights. If you have any questions about Sophos' data protection practices, please contact dataprotection@sophos.com.
